Tel.: 022 23674758 / 23755221; **E-mail:** info@onedaysurgeryindia.com

Important: This is to inform you in advance, that, there is discussion on joining of members from The Indian Society of Ambulatory Surgery. Which was started by Nova Surgical Specialities, headed by Dr. M. G. Bhat and Dr. Mahesh Reddy, senior surgeons in Bangalore. In fact, Dr. Bhat is already a member of our Association since its inception. The proposal is to accept the members of ISAS into our Organisation, with minimum of formalities. After discussion with the Executive Members and taking Legal, as well as, opinions of our CA, it was understood that it is possible to induct their members by payment of our membership fees. This will come up for discussion in the AGM, in this meeting. We will be inviting the members of ISAS to register and attend our Conference. So, if there are any opinions on this, do please let me know before hand.

We welcome any opportunity which will expand the horizon of our Organisation and help us grow, with minimal liabilities. I am sure, we will be able to overcome any difficulty, amicably.

The process of finalising the Scientific program is already underway. Cultural evening and sightseeing (for accompanying person) is being organised. Warangal is triad on three cities, Honconda, Kazipet and Warangal, form one City.

The 900 years old Temple of thousand pillars and the fort built by The Kakatiya empire is situated in this city.

This City is 3 hours drive from Hyderabad City and it is a comfortable drive, i have done it twice. As well as, well connected by train, as it is a large junction. Not an expensive city, but, with very enthusiastic Organising team, who, i am sure, will not spare any effort in making your stay please and memorable.

Please mark the dates and keep a watch for more information, on www.adscon2018.webs.com

Any of you who would like to share their experience, can do so by way of presenting a **Free paper / Video**.

Also, **The Day Surgery Journal of India**, the only journal in India, dedicated to Day Surgery, will be bringing out another issue during the Conference, if you feel that you have something to write and publish, please do so as early as possible, last dat for submission would be **15th January, 2018**.

Do attend and voice your opinions on several issues, in **the AGM**. Agenda and other necessary formalities will be circulated to you by next month.

Warm regards,

Dr. T. Naresh Row
President, The Indian Association of Day Surgery
Editor, Day Surgery Journal of India

Ambulatory surgery: The Indian perspective.

Row T. Naresh

Consultant Surgeon & Day Surgery Specialist,
One Day Surgery Centre, Mumbai.
President, The Indian Association of Day Surgery.
(Article re-published with permission and changes)

instruments which have been preserved over the years show the brilliance of the designer who fashioned them to resemble the jaws of animals and fishes. These are very similar to the modern day instruments which were invented separately. (4) Modern medicine has rekindled the interest in Ambulatory surgery and the last century has seen a gradual rise in its development.

In 1908, James Nicoll (5) in one of the largest series to be published from the Royal Hospital for Sick Children in Glasgow, UK, reported the results of 7392 day care procedures in over 9 years. He stated that admitting children for certain operations "constitutes a waste of resources of a children's hospital". He recognized that results were comparable to those in admitted patients, with significant savings to the patient and to the hospital, and further stated that "with a mother of average intelligence, assisted by advice from the hospital sister, the child fares better than in the hospital". Even then, he recognised and stressed on suitable home conditions, with proper co-operation of the General practitioners, and a promise of re-admission if needed (6). Much later, a study in the early 1950s revealed that there was a significant rate of hospital related infections in children admitted for elective surgery (7).

As the cost of surgical treatment increased, Palumbo et al (1952) (8), reported on early ambulation in a group of 2955 male patients who had undergone major surgery and noted that the economic advantage of outpatient surgery hastened its acceptance (9). It was soon realized that about 35% of all operations could be performed without the need for hospital admission and more patients were treated on the same number of hospital beds. In 1972 Cloud presented a large series of wide varieties of case performed under endo-tracheal anaesthesia, establishing its absolute safety. Outpatient surgery quickly gained momentum and surgical care acquired a new dimension (10, 11)

Definition:

UK- The admission of selected patients to hospital for a planned surgical procedure, returning home on the same day. 'True day surgery' patients are day case patients who require full operating theatre facilities and / or a general anaesthetic, and any day cases not included as outpatient or endoscopy. (13)

To be completed.....
